F. Algar, Clement's Lane, London.
G. Street, London.

Starved.
Some time ago two women died of want and privation in the streets of London. One was discovered by a policeman in the morning, sitting in a crouched-up position on a stair. On removal to a doctor's in the neighborhood it was found that she was quite dead. The following lines were written on the event:

The deep night fell o'er London,
And its riot and bustle and din—
It fell o'er the streets of the city,
It fell o'er the haunts of sin.
Where there none with hearts of pity
To take the poor wayfarer in?

She walked through Christian London,
Tired, barefooted, forlorn!
With pleading, hunger-murched features,
With aspect weary and worn;
And the wild March blast, as it hurried past,
Fluttered her raiment torn.

No home in all wide London!
She shrank from the chilly air,
She drew her tattered mantle round her,
Round her shoulders cold and bare,
And from the heat of the rain and sleet
She crouched on the lonely stair.

And through the streets of London,
The heedless crowd went on;
No one saw the friendless woman,
Nor heard her piteous moan.
No kindly heart that was human
Cared for the nameless one!

Death stalked through the streets of London,
But less unknown was he;
He saw the woman lying
In her lonely, narrow bed,
He took her hand, and in accents bland
Said "Come along with me."

Day dawned on stately London;
The sun shone warm and bright
On the woman's crouching figure,
On its melancholy plight,
On her garments torn and meagre,
On her features still and white.

Starved in the streets of London!
Yet mayhap a mother had smiled
In the old-time days of happiness,
In the laughing eyes of her child—
Those eyes that were wont to stare,
And gleam with radiance wild.

Starved in the streets of London!
'Mid its wealth and the ceaseless swell
Of its trade and commerce raising high
In the heavens. O ye who dwell
In the midst of riches and luxury,
Say—is it well?—Is it well?

"TRIUMPH OF MIND OVER MATTER."—The student of "Pre-damated" literature will recollect the account given by a very ancient classical writer, of an individual who went into the forest to build an immense ship. His idea was that it would be more practicable to construct a large vessel in the forest, because the big timber was so conveniently at hand. But after the ship was completed it occurred to him for the first time, that it would be difficult to launch it, as the sea was many miles away, and lofty hills and mountains intervened. So he sat down to study out a plan to get his ship into the water; and long before he discovered how to do it, the ship fell to pieces with dry rot. He did not possess the inventive genius of our modern shipbuilders. A few weeks ago some parties in this city determined to build a big schooner. They did not go into the forest, but had the timbers brought to the waters' edge. The hull of the vessel was completed and launched into the water; but that part of the bay into which she was launched lies inside of Stewart street, and it was discovered too late that the vessel could not be gotten under the wharf out into the open water at any stage of the tide. One thing seemed quite practicable—they might cut away a portion of the wharf, but that would entail great expense and injury to the business of hundreds of persons, and altogether it would cost more than ten times the value of the vessel. The ancient ship builder would have been in a quandary, but the builders of the schooner were not. They cut a hole in her bottom timbers and sunk her until deep enough under to admit of her passage under the wharf. The moral of the story is easily comprehended.—S. F. Herald.

DISPARITY OF SEXES.—The proportionate number of the male and female population in a nation is a question of much interest. In Great Britain, from the time of the earliest to that of the last census, the ladies have been the numerical superiors of their lords; and latterly the female preponderance has been rather alarmingly increased. Taking the enumerations in their order, and commencing with that of 1801, we find that the absolute excess of females was, at each decade, measured by the following figures:—180,207; 201,298; 210,537; 297,246; 346,950; 349,871; and 711,208. According to the last census Scotland numbered 112 females to 100 males, and England and Wales 106 to 100.

What different meanings men attach to the same words! When Jones calls a man "good," he means that he is virtuous. When Brown uses the same adjective in the same way, he means solvent. When Jones speaks of a "worthless fellow," he means a man of no character, or a very bad one. When Brown calls a man "worthless," he means worth less than a certain amount of money. The other day Brown spoke of a certain person as "a man of no account." "What does he mean by that?" asked a neighbor. "Why," said Quill, to whom the question was addressed, "by a man of no account, he means a man of no bank account!"

FRIGHTFUL TRAGEDY IN FRANCE.—The Court of Assizes of the Vancluse, sitting at Carpentras, has just been occupied during three days with the trial of a farmer, named Leonard, for the murder of his wife and two children, under horrible circumstances. Early one morning, a farmer, named Bonnaud, residing in a lone house in the commune of Pertuis, was awakened by cries for help, uttered by some person in the yard in front, and on going out he saw a man dressed in his shirt and trousers only, both of which were stained with blood, and who said that he had just escaped from the hands of persons who had attempted to murder him. Bonnaud recognized that individual as a farmer, named Leonard, whose house was at some distance across the fields, and immediately got his horse and cart to convey him home to La Thuilliere, where his family usually lived, though they had another farm at Martely, where they also sometimes resided. On arriving there, however, he found the house closed, and could make no one hear, so he drove off to the hospital at Pertuis to obtain assistance for the wounded man, who had been injured by a gun or pistol shot behind the ear. The surgeon observed that the sides of the wound were burnt with powder, but no traces of wadding or ball. As soon as Leonard was able to give explanations, he stated that he had been working with his wife and children the previous day at the farm at Martely, and that he was just getting his cart out ready to return to La Thuilliere, when he was shot by some one from inside the house. He fell and remained insensible for some time. As soon as he had recovered his senses, he had with difficulty dragged himself to Bonnaud's farm, to obtain help. What had become of his wife and children he did not know.

Two men were sent to Martely to look after the wife and children. On arriving there they found the outer door open and the rooms full of smoke, while in the middle of the bedroom lay a smouldering heap, from which the smell of burned flesh proceeded. On examination, the bodies of the woman and her child were found in it, cut into small pieces, and half carbonized. If the falling of the roof had not partially smothered the fire the house must have been entirely destroyed, and scarcely any trace of the crime would have remained. The surgeon doubts as to Leonard's statement respecting the manner in which he received his wound, excited suspicion that he was the murderer of his wife and family, and had inflicted the wound on himself with a pistol. Having been taxed with the crime he at last admitted that, aggravated by something his wife said, he struck her a blow which killed her; that he had afterwards murdered the children and set the house on fire. In his remorse for what he had done he then attempted to kill himself, but failed. Circumstances, however, were soon discovered which proved that the murder was premeditated, and that his object was to obtain the sole possession of a piece of land worth about 2500 francs which belonged to his wife and her children, and which he had already attempted to mortgage without her consent. The evidence was conclusive against the prisoner, who was found guilty by the jury, without extenuating circumstances, and condemned to death. The execution was ordered to take place at Pertuis, near the scene of the crime.

COLONIAL SECRETARY'S OFFICE,
9th June, 1862.

NOTICE IS HEREBY GIVEN THAT
instalments upon the land specified in the
Schedule hereunder written are in arrears, and that
if such instalments are not paid on or before the 11th
day of August, at the Land Office, the respective
lands in respect of which instalments are then due
will on that day be absolutely forfeited, and that all
land forfeited on that day will be put up at auction
at the upset price of 4s. 2d. an acre, on the 12th day
of August, 1862, and disposed of to the highest bidder.
Notice is given to the holders of the undermen-
tioned sections that so much of the instalments as
may be required for the purpose will immediately
after the payment of the same be applied in settling
the claims made by the Indian Titles.

pected to make the passage in 5 days.

Thursday Morning, July 17, 1862.

THE DEBTOR AND THE FELON'S CELL.

We have been accused of making a misstatement with regard to the cell in which Mr. Gordon, the debtor, is confined, and are told that the apartment which he occupies is one of two cells built by the Imperial Government for the reception of refractory sailors. If this statement be true, how does it happen that we find a man accused of the horrible crime of debt incarcerated within its four walls? And again, how is it that a man accused and afterwards convicted of a felony was confined for several weeks in one of these identical "Imperial Government" cells? The cell may be "comfortable," and is no doubt very "clean," (everything at the Barracks and prison is,) but we contend that it is no place in which to confine a debtor. A felon's cell may be as comfortable as the finest parlor in town, but it is none the less a felon's cell, and the odium arising from a confinement therein is the same. It seems that we have taken a retrograde step with regard to the treatment of debtors. Two short years ago debtors were treated by our authorities in a manner that would have done credit to inquisitors. They were not only locked up with felons, but they had to associate with them—converse with their friends through the same wicket, and breathe the same air through the same iron bars; and it was only through the exertions of this paper that the system was at last changed and a debtor's prison established. We confess that we have always looked upon this debtor's prison with a feeling akin to that of satisfaction—not because we admire the law which permits of the locking up of unfortunate debtors, (on the contrary, we abhor it,) but because it was much more comfortable than the old arrangement—did not necessitate an association with criminals—and afforded the unfortunate men more liberty and elbow-room than could be obtained in a cell. For two years it was used as a debtor's prison, and not one of its inmates escaped. At last our ex-Treasurer makes an attempt to burrow through the walls; he fails; they resist his utmost endeavors, and he finally escapes by picking the lock of a gate altogether disconnected with the prison. And then it is suddenly discovered that the debtor's jail is unsafe! Gordon had in vain endeavored to burrow through its walls—given the job up as a fruitless one, and chosen a more hazardous, but, as it proved, a more successful mode of exit. And the last debtor is made the scapegoat, and suffers a curtailment of the customary liberty accorded debtors, because of the ex-Treasurer's attempt. If the latter had kept his hands from the brick and mortar, and not demonstrated that he could not make an exit through the wall, his successor would to-day enjoy a degree of comfort and liberty compared with which the present "comfortable" and "clean," "Imperial cell" would be like a garret contrasted with a drawing-room. If the debtor's prison is really unsafe—and, notwithstanding the Treasurer's failure, it may be so—it should be repaired and rendered secure. It was the duty of somebody to have had the work done weeks ago. It was not done, and Mr. Gordon goes to an "Imperial Government sailor's cell" because of that somebody's neglect.

COMMERCIAL MATTERS.—To say that business is dull, will not convey an adequate idea of the stagnation in trade at present existing in commercial circles. But very little freight is going forward to New Westminster, and the orders received are lighter than at a corresponding period last year. Latest accounts from the diggings report provisions as very scarce and advancing, and remittances of dust and heavy orders from that section are daily looked for. The arrival of the Gov. Douglas on Tuesday, with nearly \$35,000 in treasure, and a report that nearly \$100,000 in Cariboo dust is now on the road to Yale, has had an inspiring effect on the minds of the mercantile public. We quote Golden Gate superfine flour at \$3 50 @ \$9 per bbl.; Oregon, superfine, \$8 50; Bayos beans, scarce at 12½c. per lb; reds and pinks, 10 @ 10½c., with no difficulty experienced in filling orders. Oregon bacon, 17 @ 20c.; Eastern IXL, 15c.; J. & H.'s, 16c. China No. 1 sugar, 8½c.; crushed, 15c.; Sandwich Islands, No. 1, 19c. J. & H.'s, 15c. 17 @ 18c. for cash. Hay (old) \$4 25 @ 20c.; no new in the market. Oats, 2½ @ 20c. per lb.; wheat, 3½c.; barley, 1½ @ 20c. Produce of every description is slow sale. No change to note in vegetables which meet with steady sale, principally for local consumption.

DRAWING COMPARISONS.—The Portland papers amuse themselves by drawing comparisons between the amount of gold dust shipped from Portland and the amount sent from Victoria. The Portland *Times* recently claimed about six hundred thousand dollars as the total amount sent below on one steamer, and asserts that because the amount of treasure sent from Victoria is much less than the yield of Cariboo must be to a corresponding degree inferior to that of Salmon. The argument proves nothing. About 30,000 people went to Salmon and about 5000 to Cariboo. Each person had on an average about \$500 in coin, which would give Salmon \$15,000,000 and Cariboo some \$2,500,000. The treasure now being sent from Portland is nearly all in coin, and as no mint is at work north of San Francisco, and as it is not at all likely the gold is dug out of Salmon ready coined, it is easy to be seen (admitting the amount of treasure shipped to be as stated) that it was brought there by immigrants and does not form a portion of the product of the country. That Salmon is rich we are prepared to believe; but that it is any more so than our own Cariboo, we deny.

The steamer Gov. Douglas will leave for Fraser River this day.

SAILED.—The bark Scotland, laden with Nanaimo coal, sailed from the mouth of the harbor yesterday morning for San Francisco.

FOR STICKER.—The schooner North Star will sail early this morning for Sticker. She has forty passengers and a full freight.

DISBANDED.—Gov. Douglas has, by proclamation, disbanded the Vancouver Island Volunteer Rifle Corps. What will be the next move?

SUSPICIOUS.—A drunken Indian stole some squaw fixings on Tuesday night, and falling into the hands of policeman Taylor, was fined 20s. by the Police Magistrate.

SLIGHT FIRE.—Officer Reed at 2 o'clock yesterday morning discovered a small frame house, situated on Government street, beyond Cormorant, on fire and extinguished the flames without raising an alarm. The fire had been set to some planks and shavings and was burning briskly when discovered by the officer.

ANOTHER ARRIVAL FROM STICKER.—The sloop Louise Morris, with two Chinese passengers on board, came in yesterday from Sticker River. She left the mouth on the same day as the North Star and brings about \$22 in dust from the new diggings and a quantity of furs, obtained from the Indians. The captain reports meeting the steamer Labouchere and the schooner Elizabeth in Grenville Sound, and the Tomas at Port Simpson, all bound for Sticker.

CHINESE FROM STICKER.—Two of the three Chinamen driven from Sticker River by Indians arrived here yesterday. They ascribe the action of the Indians to the influence exerted by white miners, who prejudiced the mind of the great chief Selakes against the Celestials. They will lay the matter before His Excellency, but we think that they cannot be benefitted at present in the absence of a treaty on the subject between the Celestial and Russian Governments. The establishment of a Russian custom-house at the mouth of the river (as we stated yesterday) may have the effect to overcome the prejudices of the Indians.

THE THEATRE.—This evening the Dillon troupe will make their last appearance here, prior to their departure for Australia, under the patronage of His Excellency the Governor and suite. The performance will consist of the 3d and 4th acts of "Othello," "Delicate Ground," and "Morning Call." Mrs. Dillon will favor the audience with several beautiful ballads, and, assisted by Mr. David Brooks, will sing the favorite duet of "I Know a Bank." The performance will commence at 8 o'clock, and a reduction having taken place in the price of dress circle seats, we hope to see a good house present.

AGRICULTURAL AND HORTICULTURAL SOCIETY.—Yesterday a meeting of the Agricultural and Horticultural Society was held at the Messrs. Franklin's auction room, Chief Justice Cameron in the chair. About twenty-five members were in attendance. The chairman stated the object of the meeting, and the secretary read the report, which was adopted. Seven directors then retired by ballot. Dr. Tolmie was re-elected President; A. C. Anderson, Esq., and Hon. John Tod, Vice Presidents; and J. T. Pidwell, Esq., Secretary. Messrs. George Deanes, McKenzie, Harris, Skinner, Trutch, Sprout, and Coles were chosen Directors to serve for the ensuing two years. Mr. Anderson arose, and after calling attention to the demise during the past year of several worthy members, proposed that the names of two members which still appeared on the list be ignominiously expunged, viz.: G. T. Gordon and J. D'Ewes. The motion was carried unanimously, and after a vote of thanks to the chairman, the meeting adjourned subject to the call of the Directors.

Later from British Columbia. The steamers Eliza Anderson and Otter arrived from New Westminster last evening—the former with 103 passengers and the latter with 15 passengers. On the Anderson came a cattle-drover with \$8000 in Cariboo dust, which he had received in return for cattle. The fare down was 50 cents for each passenger. Business is represented as very brisk at Quesnelle River and several new claims have been opened. The general news is unimportant. The *Columbian* has the following:

"Although miners in considerable numbers are returning, the news is confirmatory of previous reports as to the richness of the country. When we stated a short time ago that Cunningham would have gold enough to load two mules in the fall we considered it a startling announcement. We are, however, assured by subsequent arrivals that they would be no way surprised if a few weight were taken out of that claim during the present season. We have just conversed with a returned miner, who informs us that he saw 33lbs. of gold washed up on the 25th of June, being the proceeds of one day's operations, and on Antler he saw 100 oz. as the result of one day's work. Red Gulch, 12 miles from Williams Creek, in a northerly direction, was struck in June, and quite a rush thither was the immediate result. About 100 claims were staked off, on four of which work had commenced, and \$15 to \$20 a day to the hand taken out from the start. It is expected that this gulch will prove rich, as indications are considered good by old miners. Upwards of 300 left the Forks of Quesnelle about the 6th of June for the country watered by the upper or north branch of Thompson river. No definite information as to the result has reached us; but the fact that they had subsequently dispatched a party to the Forks for a fresh supply of provisions, paying for the same with dust obtained there, would seem to indicate success. A party of five left Alexandria for Peace river on the 5th of June, taking with them two year's provisions. Two of the same party worked on that river last year, making as high as 5 oz. a day to the hand with rockers.

Cariboo Correspondence.

ANTLER CREEK, JUNE 18, 1862.

EDITOR BRITISH COLONIST.—According to promise I suppose I must write you a letter, although I scarcely know how to begin it. I find that I, in common with most of the people who came here this spring for the first time, have been disappointed—not in the reputed wealth of the opened diggings, but in the chances for getting paying claims. How many of us whilst sleeping either on board the steamer or under the blue canopy of Heaven, dreamt of this modern Ophir as only waiting our coming to be deprived of its hidden treasures; how different now to apply the test of reason, in those our waking senses—and the usurper fancy dethroned—truly the present realization is startling; men with limited means and provisions at enormous prices, cannot afford to dig and delve in these creeks and hill-sides, and they look at each other and ask, what is to be done? Pride says don't go back; but necessity starting them in the face, puts pride to shame, and sets aside as naught the "what will people say?" You may suggest that I am looking too serious at the whole matter, and this you say or think as you sit in the "Colonial," or "Hotel du France," buttering your morning toast, or sipping your evening tea, but let me Asmodeus like bring you from the balmy atmosphere of Beacon Hill to the enervating air on the summit of Snow-Shoe Mountain, or here on the slimy banks of one of our richest creeks. There by you camp fire you see men cooking their last mess of beans, they have no flour, no bacon, and the spring trickling by the side of their weather-beaten tent supplies their beverage; there they cluster around that scanty fire for the rain, rain, is never-failing, and nearly overcomes their united efforts to keep a fire burning. Let us suppose the scanty meal finished, and in charity pass their dreams of home, happiness, and plenty, whilst we accompanying them to diggings. Here they find (and we cheerfully add our mite of testimony) that the reputed wealth of opened claims and their fortunate owners has not been exaggerated. We look at "Steele's," "Abbott's," "Cunningham's" and a dozen others, and as our wistful eyes encounter those of the contented owners of the claims we feel a slight twinge of envy—but boldly stepping up ask for work are told that friends have too great a claim on their favors. Disheartened, but not yet discouraged, applications are made again and again, but with like ill-success. There remains only one thing, and that is to prospect for a remunerative claim. But here we must stop and leave our miners as, alas, too many are now left penny and breadless in a new country. If you think I have been overdoing the picture—ask some of the returned, and if you ask my provisions are so high, look at the nature of the first invoices, which invariably follow civilization, and the predominant article will be whisky. Ask again and look at the mean policy of the government which imposes such enormous duties upon the necessities of life. But I am growing tedious and will leave the subject and return to the all-absorbing one, the diggings of Cariboo. I have noticed that a great many even of the new comers have struck good claims, and some could sell out and return with plethoric purses. Many have found friends who either gave them employment or an interest in a paying claim—others, again, fortunate enough to be possessed of ready money or credit have bought into claims and are already commencing to realize handsomely. And lastly, I have found that the richest class, and they are not mean in character nor number, are of a stamp not inaptly termed noble men—they are the true nobility of this country, generous, hardy and adventuresome; they have suffered long and endured much in prospecting this almost impenetrable country, but they have, by long patience and severe toil, amassed wealth sufficient, with proper economy, to live and enjoy the comforts of life under the shade of their own vine and fig trees.

If there is one thing more than another that could keep a man in this country until he is quite ready to leave it for good, it is the awful beastly (but inveterate fail me) state of the road—not that portion over which a toll road (instead of a free government road with a tax, and wealth to build and support it) is being built; but after leaving that, see men with from fifty to one hundred pounds on their backs, thus virtually making pack-animals of themselves, without the advantages of pack-saddles—trudging through bog and mire, snow and slush, climbing over rocks and fallen trees, or walking over precarious bridges which span some of the mountain gulches, where a slip or misstep would endanger life and limb. Why it seems as though nature, jealous of her wealth, had rendered the path to her secret repository as intricate and dangerous as possible, and also as disagreeable as incessant showers of rain, accompanied with gusts of thunder and lightning, can possibly make it. The amount of gold that will be taken out of the Cariboo mines this season—notwithstanding the detrimental combinations heretofore alluded to—will surprise the world. Only yesterday one claim on Williams Creek—"Cunningham's"—washed up from one day's work, seventeen and a half pounds of gold dust; but bear in mind they have been for weeks past engaged in ground-slicing, laying in flume and sluice; and their claim is one of the richest on that creek—shares could not be bought to-day for less than thirty-five or forty thousand dollars for one hundred feet. Abbott's claim will also give a good report of itself in a few days; whilst Steele's company are getting in sluices preparatory to working two groups of men—one night and one day. There are many others on this and on Antler, besides those on the adjacent creeks, which will turn out large amounts of the glittering ore this summer, and give employment to a great many. Besides which we daily hear of individual instances of success, and take it all in all, there is a good time coming; only wait a little longer.

The prices of provisions on Antler Creek are as follows: Retail—Flour 90 cts. per lb.; bacon, none in market; beans, \$1; coffee, green, \$1 25; tea, \$3; sugar, \$1; rice, \$1 50; yeast powders, \$1 25 per box; hams, \$1; whisky, market overstocked; tobacco, \$3 per lb.; Lumber, per 1,000 feet, \$125; beef, fresh, 60 @ 65 cts.; long rubber boots, \$25; short do., \$12 @ \$15; pants, \$6 @ \$12; shirts, grey, \$5; nails, per lb., \$2; axes, \$8. Up to the present time 100 animals have arrived at Antler, principally loaded with provisions and liquors.

BANKRUPTCY COURT.—In re A. H. Francis. Mr. McCreight (instructed by Mr. Denness), appeared for the bankrupt, Mr. Cary for some of the creditors. An amended balance sheet having been filed by the bankrupt, the further hearing was adjourned until 30th July.

DR. J. FLATTERY, M. D.—This successful physician and surgeon from San Francisco continues at the Colonial Hotel, Victoria, V. I., where he can be consulted for a short time previous to his return to San Francisco, Cal.
Dr. Flattery having for the last twenty years been actively engaged in the practical treatment of all medical and surgical diseases of Europe, the United States, Australia and the South Sea and Sandwich Islands, and during which time he has had THOUSANDS OF PATIENTS under his medical supervision, and by careful and practical attention to all diseases both of a Private and General nature, (having diagnosed the true Physiological and Pathological character of these diseases by microscopic and other minute researches,) has thus been enabled to restore the enfeebled, debilitated and exhausted constitution to a state of energy, health and happiness, and as it respects the curing of the deathly faculties of the brain and nervous system to a new existence and renovated life, with all its natural concomitant enjoyments.

Therefore the "Honourables of this City" are particularly invited to avail themselves of an opportunity to get well.
His new treatment and special attention to Consumption, Asthma, Rheumatism, Gout, Indigestion and Secondary Symptoms, warrant a more favorable result in these most prevalent complaints than is generally entertained. With these affections he often blends Heart Disease, Dyspepsia, Liver Complaints, Piles and Female Affections, so that there also receive his attention as well as Operative Surgery and Chronic Diseases generally.

The Doctor promises to instruct persons, individually or by classes, in the peculiarities of his successful treatment of the above complaints, and with reference to all letters addressed to him as above, or San Francisco, Cal., stating name, place, time taken ill, constitution, occupation, number of treatments submitted to, description of causes and symptoms experienced, and the mode of treating; he will send medicines with directions to cure any disease. Observe, his Rooms are at the Colonial Hotel.

¶ We would call attention to the advertisement in our columns of Watts' Nervous Antidote, one of the most remarkable discoveries of modern times. It is not like the thousand and one remedies offered to the public that cure everything, but it is a specific remedy for all cases arising from nervous derangement. Its merits have been proved in numerous instances known to us, from various causes, and many a bed-ridden invalid has been restored to health. This is one of the remedies of the day which is really worthy the confidence of the public. Having read the advertisement, go to the nearest druggist and purchase a bottle; then will you join with thousands in its praise, and be grateful to us for calling your attention to this miraculous medicine.

¶ DR. HOSTETTER'S STOMACH BITTERS should be in the possession of everybody in the mining region. As a preventive of various dangerous diseases to which the gold seeker is liable, it has no superior. While it is quite palatable even as a beverage, it is speedy and powerful in its effects upon the system. In all cases of Diarrhoea, Dysentery, and the prevailing fevers consequent upon exposure, the Bitters will be found invaluable as a corrective. No man should enter upon the exposed camp life of a miner without being provided with Hostetter's preventive of stomach disease, nor should any of those who are now engaged in the occupation, fail to have recourse to the Bitters.

W. H. OLIVER, Agent for Victoria.
Sold by Druggists and dealers everywhere.

WATTS' NERVOUS ANTIDOTE
AND PHYSICAL RESTORATIVE.

THE MEDICAL WONDER OF THE
Age. The most powerful and wonderful medicine ever discovered.

WATTS' NERVOUS ANTIDOTE.
Has cured, and will cure, more cases of Nervous disorders than any other known remedy.

WATTS' NERVOUS ANTIDOTE.
Has and will cure Nervous Headache, Giddiness, Fainting, Paralysis, Extreme Debility, Neuralgia, Chronic and Inflammatory Rheumatism, Toothache, etc.

WATTS' NERVOUS ANTIDOTE.
Is an effective remedy for Wakefulness. Its soothing and quieting influence is remarkable.

WATTS' NERVOUS ANTIDOTE.
Will cure Delirium Tremens, Nervous Trembling, Epilepsy, Twitching of the Facial Nerves, Convulsions, and Pulmonary complaints.

WATTS' NERVOUS ANTIDOTE.
Will set upon that state of the nervous system which produces Depression of Spirits, Anxiety of Mind, Mental Debility, Hysterics, etc., and is so wonderful in rejuvenating premature old age, and correcting the errors brought by excess and indulgence, that nothing but a trial can convince the patient of its qualities. It is not an excitant but a strengthener, purely vegetable and harmless; like a skillful architect being by laying a firm foundation, and gradually but incessantly adding strength and vigor until nothing is left unfinished.

WISLAR'S BALM OF WILD CHERRY,
The Best Remedy ever known to Man,
For Coughs, Colds, Asthma, Croup, Bronchitis, Influenza, Bleeding of the Lungs, Difficult Breathing, Liver Affections, Pain or Weakness of the Breast or Side, First Stages of Consumption, &c., &c.

In short, this Balm is peculiarly adapted to every disease of the Lungs and Liver, which is produced by our ever-varying climate.

Influenza and Consumption.
It is indeed a melancholy truth that thousands fall victims to consumption every year from no other cause than colds and influenza, which, if neglected, may, in many cases, lead to the most fatal and dangerous of diseases, and let them run on for weeks, and even months, without thinking of the danger. At first you value what you consider a slight cold or cough; you allow business, pleasure or carelessness to prevent you from giving it any attention; it then settles upon your breast, you become hoarse, have pains in the chest, you expectorate large quantities of matter, perhaps mixed with blood; a difficulty of breathing ensues, and then you find your own foolish neglect has brought on this complaint. If, then, you value your life or health, be warned in time and don't trifle with your cold, but immediately procure a bottle or two of that famous remedy, Dr. WISLAR'S BALM OF WILD CHERRY, which is well known to be the most speedy cure ever known, as thousands will testify whose lives have been saved by it.

For Influenza it is the very best medicine in the world.
Be not deceived, remember that it is
Dr. Wislar's Balm of Wild Cherry
that performs the most wonderful cures, and it is the remedy that will afford you immediate relief.

Sold by all Druggists.

MISCELLANEOUS.

Dr Guyon's Improved Extract of

Yellow-Dock and Sarsaparilla.
THIS EXTRACT OF YELLOW-DOCK AND SARSAPARILLA is a positive, speedy and permanent cure for all diseases incident to females. Its mild alterative properties render it peculiarly applicable to the tender and delicate constitution of the female. It is unrivalled in its effect upon such diseases as Incipient Consumption, Barrenness, Leucorrhoea or Whites, Irregular Menstruation, Incontinence of Urine, and General Prostration of the System.

It immediately counteracts that distressing nervousness and Lassitude so common to the female frame and impairs an energy and buoyancy as surprising as they are grateful. We have evidence on file which induces us strongly to recommend this medicine to married people who have not been blessed with offspring.
The Shaker prepared "Yellow-Dock" and the Red "Houndstooth Sarsaparilla" are the invaluable remedial agents from which Dr. Guyon's Improved Extract of Yellow-Dock and Sarsaparilla is formed, and the Laboratory of Dr. Guyon has given us the virtues of the roots in their perfection. Its preparation contains all the restorative properties of the roots combined and concentrated to their utmost strength and power.

Experiments were made in the manufacture of this medicine until it was found that it could not be further improved.
Accordingly we find it resorted to almost universally in cases of Hepatic, Scorbatic and Cutaneous complaints for general prostration of all the vital powers and all those tormenting diseases of the skin so trying to the patience and so injurious to the health.

WISLAR'S BALM OF WILD CHERRY,
The Best Remedy ever known to Man,
For Coughs, Colds, Asthma, Croup, Bronchitis, Influenza, Bleeding of the Lungs, Difficult Breathing, Liver Affections, Pain or Weakness of the Breast or Side, First Stages of Consumption, &c., &c.

In short, this Balm is peculiarly adapted to every disease of the Lungs and Liver, which is produced by our ever-varying climate.

Influenza and Consumption.
It is indeed a melancholy truth that thousands fall victims to consumption every year from no other cause than colds and influenza, which, if neglected, may, in many cases, lead to the most fatal and dangerous of diseases, and let them run on for weeks, and even months, without thinking of the danger. At first you value what you consider a slight cold or cough; you allow business, pleasure or carelessness to prevent you from giving it any attention; it then settles upon your breast, you become hoarse, have pains in the chest, you expectorate large quantities of matter, perhaps mixed with blood; a difficulty of breathing ensues, and then you find your own foolish neglect has brought on this complaint. If, then, you value your life or health, be warned in time and don't trifle with your cold, but immediately procure a bottle or two of that famous remedy, Dr. WISLAR'S BALM OF WILD CHERRY, which is well known to be the most speedy cure ever known, as thousands will testify whose lives have been saved by it.

For Influenza it is the very best

MEDICAL.

THE WORLD'S FRIEND!
Holloway's Ointment.

A Cure for Piles and Fistulas.

Inflammation of sensitive parts, piles, fistulas, and such like painful diseases may be presently relieved and ultimately cured, by the proper and diligent use of this cooling and healing Ointment, whose action should, in such cases, be assisted by judicious doses of Pills: ere many days have elapsed the anxious patient will experience a wonderful degree of ease from this treatment. They are equally suitable to both sexes, and all ages.

Coughs, Colds, and Asthma.

"From the *Kilrush Advertiser*, June 2nd, 1860. E. BOARDMAN COX, Esquire, Magistrate, said in his Court Room at Kilrush, that he knew and had seen the Boardman Pills and Ointment actually turned out as insecure, on his way home to Kilrush, he purchased at Ennis, Holloway's Pills and Ointment, and

Gout and Rheumatism.

The essence of these diseases lie in the blood, which has, floating through each vessel, the pain-giving poison, which irritates and inflames every tissue it comes in contact with, and produces the hot, swollen, elastic enlargement about the joints so characteristic of gouty diseases. The philosophy of cure consists

Dropsy, Swollen Legs or Ankles. The various kinds of dropsies, whether windy or watery, arise from some obstruction to the free circulation through the blood vessels or lymphatics, or depend on the inflamed state of some secreting surface. Holloway's remedies, of which the efficacy cannot be exaggerated, act directly upon the blood, the absorbents and secretions, with a power that no dropsy

This invaluable Ointment was never known to fail in the cure of any wound, any sore, or any ulcer, as can be proved by innumerable testimonials from persons who had been discharged from Hospitals incurable, and yet by perseverance they have been cured.

Bad Legs	Chilgeo-foot	Fistulas	Sore-throats
Bad Breasts	Chilblains	Gout	Skin-diseases
Burns	Chapped Hands	Glandular	Scurvy
Cankers	Corns (Soft)	Sore-throats	Sore-eyes
Blisters Mos-	Cancers	Lumbago	Tumours
quitoes and	Contracted and	Piles	Ulcers
Sand-Flies	Stiff Joints	Rheuma-	Wounds

There is a considerable saving by taking the larger sizes.

N. B.—Directions for the guidance of patients in every disorder are affixed to each Pot.

Bilious Affections,

LIVER COMPLAINTS

JAYNE'S SANATIVE PILLS,
A Mild, Prompt, and Effective Remedy

There is scarcely any disease in which purgative medicines are not required; and much sickness and suffering might be prevented were they more generally used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might be avoided by the timely use of these pills.

And confirmed by the correctness of these views,
JAYNE'S SANATIVE PILLS
 Are recommended with the greatest confidence, ex-
 perience having demonstrated them to be far super-
 ior to any other in use, being more mild, prompt, and
 sure in their action. When taken, requiring them,
 no particular care is required, and patients may eat
 and drink as usual. Age will not impair them, as
 they are so combined as to always readily dissolve
 in the stomach. In small doses they are alterative,
 and gently laxative, but in large doses are actively
 cathartic, cleansing the whole alimentary canal from

For DYSPEPSIA, these Pills are really an invaluable medicine, gradually changing the vitiated secretions of the Stomach and Liver, and producing a healthy action in those important organs. In cases of long standing, a cure will be more speedily effected by using, in conjunction with the Pills, *Dr. Jayne's Alternative or Tonic Vermifuge*, according to directions.

Liver Complaint, Gout, Jaundice, Affections of the Bladder and Kidneys, Fevers, Nauseas, Dropsy, Rheumatism, Gravel, Catarrhs, Stricture, Hemorrhoids, Discharge of the Skin, Impurity of the Blood, Scurvy, Headache, Costiveness, Piles, Female Diseases, and Bilious Affections. These Pills have proved themselves

trial. The SANATIVE PILLS and all of Dr. D. Jayne's Family Medicines are sold by CURTIS & MOORE and LANGLEY BROS., Victoria, from whom may also be obtained "Jayne's Medical Almanac and Guide to Health," containing, besides a valuable Calendar, a catalogue of Diseases, together with the symptoms by which they may be known, and the proper remedies for their cure. !e16 1m
